

CBRT

INFORMATION TECHNOLOGY MISSION

CBRT IT Mission
CENTRAL BOARD OF RESEARCH AND TECHNOLOGY
Promoted by Government of India.

PROFILE

CBRT is a committed venture for IT Services by a team of dedicated professionals having distinct experience in technical and functional domain both are in domestic and international training. Their long association with the industry has equipped them with proven proficiency to lead the venture to its aspired goals. The entire training process has been chalked out by combining the strength of proven and potential Technologies and experience of leading professionals from the industry and consulting services. Utilization of resources are pledged to a systematic and properly channeled learning activity to ensure a long-term student development.

CAREER

Today information technologies are within the reach of far more people, they have found there was in to offices factories, schools, colleges, homes etc. IT / Computer user communities are today facing the largest manpower shortage in the world. According to a survey, this industry needs over 3million computer professionals for a variety of jobs like programmers, project executives, consultants and system analysts every year. Though there are a lot of institutes, many are lacking quality because of unqualified faculties, poor facilities and most of them are teaching shops formed a training division not to give impart quality computer training. Our aim is to spread information technology

CBRT IT Mission

CBRT Promoted by Government of India launched this advanced Information technological courses to train students in India to get IT specialist jobs all over the world especially USA, Canada, Australia, New Zealand, Gulf and Singapore in latest IT technologies. Multi national companies in techno parks Kerala and other states needed trained professional manpower to execute their offshore projects on time and on demand. We designed our courses to make you ready for this type of IT professional jobs in India, Europe and America etc. The software training and education division of CBRT has, in a short span of time, grown to become the most popular training division across the world.
